

Cheongfuli (Xiamen) Co., Ltd.

Environmental Protection Policy

1 Purpose

With the mission of “Creating New Value for a Better Life for All,” Cheongfuli (Xiamen) Co., Ltd. (hereinafter referred to as “Cheongfuli” or the “Company”) is committed to creating an environmentally friendly and comfortable business and living environment for stakeholders worldwide, and endeavors to minimize the environmental impact caused by its own operations. This policy is hereby established.

2 Scope

This policy has been formulated on the basis of broad consultation with internal and external stakeholders, and applies to Cheongfuli and all entities over which it has operational control. This policy covers the entire value chain, including procurement, operations, sales, and services. Each business unit may formulate its own environmental protection policy based on its actual circumstances, which shall be consistent with this policy. In addition, the Company encourages distributors and logistics providers, suppliers, service providers, contractors, merger and acquisition counterparties, and other key business partners to also comply with environmental protection policies consistent with this policy.

3 Relevant Measures

3.1 Compliance with Laws and Regulations

The Company strictly complies with the laws and regulations relating to environmental protection in China in the course of its operations, and strictly complies with all applicable laws and regulations of the countries and regions where it conducts business.

3.2 Assessment of Environmental Impact

The Company identifies and assesses the environmental impact of its business development and operations through the establishment of a comprehensive and scientific risk management system.

3.3 Addressing Climate Change

The Company reduces greenhouse gas emissions and resource waste in its operations through green office practices and green operations, active use of clean energy, and promotion of resource recycling, while encouraging all stakeholders to reduce greenhouse gas emissions in their daily activities and working together to promote the green development of the industrial chain. The Company is committed to reducing the impact of its business on climate change and enhancing its resilience in addressing climate change.

3.4 Biodiversity Conservation

The Company pays attention to the potential impact of its operations and value chain on biodiversity, and undertakes to comply with the relevant laws and regulations on biodiversity conservation of the country and the countries where it operates. In daily operations, the Company advocates green office practices and resource conservation, and does not procure or use rare or endangered species of animals and plants or their products. The Company promotes cooperation with core suppliers and encourages them to avoid adverse effects on nature reserves in raw material procurement, warehousing and logistics, and other processes.

3.5 Water Resource Conservation

The Company complies with the requirements of laws and regulations relating to water resource conservation and attaches great importance to the environmental impact of water resource consumption. In the course of operations, the Company optimizes water resource management measures, improves water use efficiency, and reduces water consumption intensity to ensure the sustainable use of water resources, especially in water-scarce

regions. The Company also encourages employees and all stakeholders to practice water conservation concepts and jointly participate in water resource protection. The Company undertakes to encourage suppliers to set quantifiable water resource management performance targets and achievement timelines, and to collaborate in water efficiency improvement initiatives, thereby facilitating the continuous improvement of supply chain water management performance.

3.6 Reduction of Pollutant Discharge

The Company strictly complies with the laws and regulations relating to the discharge of waste, waste water, waste gas, and other pollutants, continuously improves its environmental management system with reference to ISO 14001 and other international standards, and strictly controls pollutant discharge at all stages of operations. The Company encourages its subsidiaries and employees to reduce pollutants at the source and lower the environmental burden. At the same time, the Company adheres to the principles of resource recovery, reduction, and harmless treatment, actively recycles and reuses waste, and promotes the development of a green circular economy.

3.7 Environmental Advocacy and Promotion

The Company conducts training for employees and stakeholders on topics such as environmental advocacy, climate change response, and water resource conservation, encourages the organization of or participation in environmental protection-related activities, and enhances the environmental awareness of employees and stakeholders in both work and daily life, thereby jointly promoting environmental protection.

3.8 Continuous Improvement of Environmental Performance

The Company's management is responsible for overseeing the implementation of environmental management, strictly adheres to the

environmental protection measures set forth in this policy in the course of operations, and is committed to continuously improving environmental performance and reducing the environmental impact caused by the Company's operations through measures such as setting environment-related performance targets, regularly publicly disclosing environmental performance, and proposing improvement recommendations.

4 Effective Date

4.1 This policy has been reviewed and approved by the Company's management, who shall be responsible for overseeing its implementation.

4.2 This policy shall come into effect from the date of its publication.
